

FLEXI BELLOW MAXI

Flexi Bellows Maxi is an accessory which substantially extends the lens suitability options of the Silvestri Bicom 2 camera. From the Schneider Digitar 47mm XL lens above, all the high performance digital lenses can be used with this new accessory. The **Flexi Bellows Maxi** mounts lenses with the Silvestri bayonet without the requirement of a helical focusing ring – so saving money. Moreover the lenses can also be used on other view cameras via an adapter board with Silvestri bayonet attachment. The extension capability of the rail together with the advantage of the micrometric focusing extends the versatility of the Bicom 2 in still-life, industrial, architectural photography and in all the other fields where high quality performance is paramount. The **Flexi Bellows Maxi** features side shift movements and micrometric tilt and swing movements.

SPECIFICATIONS
